

Group 42 Report - 13/03/20 - 27/03/20

Adnan Ahmad, Rajesh Goyal

Status Of The Project

Final stretch towards submission was difficult given the coronavirus epidemic forcing us to work remotely. The chatbot was completed successfully, with the chatbot visualising contract, NDA and academic information. Furthermore, the admin panel was rewritten into a GUI interface to make it more intuitive for users. Finally, we deployed our chatbot to Azure where it can now be accessed from a website.

Updates With Client

The key updates have been:

- Submission of our project to Dr Mistry

List of completed tasks

- Chatbot is completed with all requirements fulfilled
- Admin panel rewritten as a GUI application that works with new schema
- Update feature added to admin panel which lets existing record values be changed
- Application successfully deployed

Next Steps

- Wait for our grade!

Progress By Team Member

- Adnan finished the chatbot and rewrote the admin panel
- Rajesh completed extensive testing of both applications and was able to expose lots of errors in code that were then fixed
- Rajesh also deployed the chatbot to Azure
