Group 42 Report - 24/01/20 - 07/02/20

Adnan Ahmad, Rajesh Goyal

Status Of The Project

We are now progressing further in the development of the chatbot. We have started on using adaptive cards in the chatbot to display project information. This is in its first stages but we have been able to display some information to the screen.

Updates With Client

The key updates have been:
- Readjusted requirements with Dean following Sam leaving the team

List of completed tasks
- Adaptive Cards have been added to the chatbot over messages
- LUIS integrated into chatbot
- Began working on cards for chatbot
- Search results now return from database

Next Steps
- Expand the use of adaptive cards to include all project information

Progress By Team Member

- Rajesh worked on deliverables for the previous deadline and is now working on the parser to implement a console application to insert into the database.
- Adnan is working on all the chatbot functionality and is expanding/experimenting with adaptive cards to see their capabilities with displaying project data.
